

AIR II Device

About AIR II

The AIR II camera offers advanced AI (ADAS & DMS) event reporting, GPS tracking, engine diagnostics*, and other valuable camera capabilities in a single, easy-to-install device. Featuring a 1080p HD lens, the camera can be installed behind the rear-view mirror, reducing field-of-vision concerns.

Note: *Diagnostic data is not guaranteed and may vary depending on the vehicle's make, model, and year.
